Commissioner, Place 4

### **Public Announcement: Important Notice Regarding Carport Construction in San Benito**

The City of San Benito wants to remind all residents and property owners about the importance of adhering to **Ordinance No. 2252** regarding the construction of carports. According to this ordinance, **it is unlawful to build a carport on your property without obtaining a proper building permit** from the city.

Constructing a carport without a permit can lead to **finances, removal orders, and additional enforcement measures** to ensure compliance with city codes. Permits are crucial in guaranteeing that structures meet safety standards, respect property boundaries, and align with the city's zoning regulations.

#### **How to Obtain a Permit:**

1. **Visit the City of San Benito's Building Department** to apply for a carport permit. Staff members are available to assist you with the process and answer any questions.
2. **Submit necessary documentation** including design plans and site information, which will be reviewed to confirm compliance with local building codes.
3. **Await permit approval** before beginning any construction.

The City of San Benito is committed to maintaining a safe and attractive community for everyone. Please help us achieve this by following Ordinance No. 2252 and securing a permit before constructing a carport or any similar structure on your property.

For further information, contact the **City Building Department** at 956-361-3804 Ext. 403 or visit [cityofsanbenito.com](http://cityofsanbenito.com).

Thank you for your cooperation in keeping San Benito safe and compliant!
